

The obvious and “hidden” mechanisms of repression will finally fail

We are greeting the thousands of young men and women, workers, school and university students who participated and demonstrated in huge blocks of the CPG (KKE) and KNE, stating their outrage at the cold-blooded murder of a fifteen-year-old boy named Alexander and the intensity of state repression.

We express our condemnation to all the Greek people and youth of an organised plan of intimidation, the creation of images of chaos, arson and disasters that have nothing to do with the spontaneous outbursts of anger among young people. We have to face a well-trained mechanism, well known to the state services and the parties of the plutocracy. The effort to hit and disband the rally of the KKE and KNE in the centre of Athens has failed.

We stress the necessity of all the political youth wings taking a clear position on condemning this mechanism. This is designed in order to allow new measures of repression to be taken against the labour movement. These well-known provocateurs had as an umbrella the block of SYRIZA throughout the whole demonstration. Such forces that are caressing provocateurs and fish in dirty water are contributing to the objective of the struggling youth and labour movement.

The only appropriate answer is for people and youth not to hang their heads. Now more than ever a response is necessary by the organised movement, a self-guarded, politicised movement against the power of monopolies and imperialism.

- Everybody today and tomorrow to participate in the organised demonstrations of the Co-ordinating Body of Struggling Unions of Schools in all cities of Greece!
- Everyone to participate in the all-workers’ strike on Wednesday!

The obvious and “hidden” mechanisms of repression will fail.

Athens, 8 December 2008

Press Office of the CC of KNE
